RANGE OF DECORATIVE PRODUCTS

Established in 1989, Rang Décor has become a beacon of innovation in the realm of interior design and décor. With unwavering dedication and a passion for excellence, we have set new benchmarks, leaving a lasting legacy in the industry. In 2015, we embarked on a transformative journey with the launch of our iconic brand name, “**Rang Décor.**”

#### **PASSION**

Our team is driven by a love for design and aesthetics. We pour our hearts into every project, ensuring that each design is a work of art. We stay updated on the latest design trends to bring fresh ideas and creativity to make each product unique.

#### **INTEGRITY**

Our commitment to ethical practices means we deliver on promises and maintain transparent communication, building lasting relationships with our clients.

#### **TRUST**

Client trust is paramount. We understand our client's needs and preferences, ensuring that we deliver services that exceed their expectations.

#### **INNOVATION**

We keep constantly evolving with new trends in building materials industry to offer the best products which can transform spaces aesthetically.

# TEST PASS

# Application Guide, Technical Support & Warranty

## Application Areas

Faded Acrylic laminates offer a premium, long-lasting surface solution for modern interiors. With a rich matte or gloss finish, they are suitable for a wide range of applications.

## Recommended Applications:

### Residential Interiors:

- Kitchen shutters and wall cabinets
- Bathroom vanities and wardrobes
- Living room furniture and entertainment units
- Bedroom sliding doors and headboards

### Commercial Spaces:

- Retail display shelves and counters
- Office desks and partitions
- Hotel receptions and hospitality interiors

## Technical Guidelines

### Product Specifications:

- Type : Pure Acrylic Laminate
- Thickness : 2 mm ( $\pm 5\%$ )
- Sheet Size : 2440 mm  $\times$  1220 mm
- Available Finishes : Matte & Gloss

### Structure Composition:

- Premium Acrylic surface layer
- Adhesive interface
- Decorative color base film
- Primer layer for improved bonding

\*Product dimensions may vary by  $\pm 5\%$ . Slight color differences may exist between actual products and brochure/catalogue images

## Handling, Cutting & Installation Guidelines

Proper handling and installation are essential to maintain the quality, finish, and performance of acrylic laminates.

### Installation Best Practices:

- Do not roll the sheets. Faded Acrylic is not designed to be rolled under any condition.
- Store sheets flat on a smooth, even surface to prevent deformation.
- Substrate (ply, MDF, or particle board) must be clean, flat, and moisture-free.
- Thoroughly clean the back side of the acrylic sheet before adhesive application.
- Apply uniform pressure for at least 15 hours after bonding to ensure long-term adhesion.
- Use PEVA or acrylic-compatible adhesives only. Do not use SR or rubber-based adhesives.
- Do not exceed 8 ft  $\times$  2 ft panel sizes. Leave a 2 mm groove between sheets to allow air release and expansion.
- Use sharp, well-balanced tools designed specifically for acrylic laminates.
- Do not cut using dull or bent blades.
- Do not install on chemically treated or dipped substrates without proper sanding.
- Do not place hot objects directly on the surface.
- Do not store leftover sheets rolled or folded, especially faded ones.

## CAUSES OF YELLOW PATCHES AND COLOUR FADING AFTER INSTALLATION:

If hot cookware or utensils are directly placed on the laminate.

Use of inferior or sub-standard dipped plywood or dipped lipping patti, which may chemically react with the adhesive.

The use of synthetic rubber adhesives such as SR / Jat Pat, Bostic, Heatx, etc.

Prolonged exposure to high temperature (above 30°C-35°C)

Exposure to direct sunlight can greatly affect a laminated appearance.

Our consumers can be rest assured about using totally environment friendly products. We create innovative designs maintaining international safety and sustainability standards, leaving zero carbon footprints.

## REASONS FOR AIR BUBBLE FORMATIONS ON LAMINATES:

Insufficient or lack of pressing during the bonding period of laminate

Use of water base synthetic resin adhesive any other than PEVA (Polyethylene Vinyl Acetate Co-polymer)

Laminates are bonded in extremely humid conditions

Debonding in certain areas because of uneven substrate surface

When substrate loses moisture after installation

Use of extremely large acrylic/PVC laminate sheets for maximum utilization

## Yellow Patches & Fading – Causes & Prevention

### Causes:

- Solvent-based or SR adhesives
- Using dipped plywood or lipping without sanding
- Exposure to sunlight or UV
- Delayed removal of the protective film
- Storage in hot, humid, or dusty environments

### Prevention:

- Use only PEVA-based water adhesives
- Sand dipped substrates to remove color chemicals
- Remove the film within 6-7 days
- Avoid exposure to direct sunlight or excessive heat
- Store and use in clean indoor environments only

## Storage, Packing & Transportation

- Store the sheets flat in a clean, dry space, away from heat and sunlight
- Do not keep in dusty areas or for extended periods before installation
- Use only undamaged surfaces during packing and transportation
- Avoid placing heavy loads on sheets
- No claims will be accepted for transportation damage

## Notes & Warranty

- Rang ensures all its products are free from manufacturing defects and are suitable for standard indoor use.
- Always inspect material before installation — no claims will be accepted after cutting or bonding.
- Rang is not liable for issues caused by plywood, adhesives, or other installation materials.
- No complaints will be entertained if guidelines are not followed properly.
- Beware of counterfeit products — look for the official Rang sticker before purchase.
- Product dimensions may vary by  $\pm 5\%$ . Slight color differences may occur between actual products and catalogue images.
- Rang Faded sheets are meant for indoor use only.

## Do's & Don'ts

### DO'S (अवश्य करें):

- Use only proper adhesive made for acrylic. केवल ऐक्रेलिक के लिए उपयुक्त गोंद का उपयोग करें।
- Ensure the substrate is dry, clean, and flat. सब्सट्रेट को सूखा, साफ और समतल रखें।
- Clean the back surface of the acrylic before bonding. बोंडिंग से पहले शीट की पिछली सतह को साफ कपड़े से साफ करें।
- Remove the protective film within 6-7 days after installation. इंस्टॉलेशन के 6-7 दिनों के भीतर प्रोटेक्टिव फिल्म हटा दें।
- Use sharp and proper acrylic cutting tools only. ऐक्रेलिक के लिए केवल उपयुक्त तेज टूल्स का उपयोग करें।
- Check batch numbers to avoid shade variations. शेड डिफरेंस से बचने के लिए हमेशा एक ही बैच की शीट्स का उपयोग करें।
- Leave a 2 mm air groove between two sheets. दो शीट्स के बीच 2 मिमी का गैप रखें ताकि हवा बाहर निकल सके।

### DON'TS (न करें):

- Do not use SR, rubber-based, or synthetic adhesives. SR, रबर-बेस या सिंथेटिक गोंद का उपयोग न करें।
- Do not use dull, damaged, or tilted blades for cutting. कटिंग के लिए टेढ़े, टूटे या ब्लंट ब्लेड का उपयोग न करें।
- Do not store sheets in dusty or dirty conditions for long periods. शीट्स को धूल या गंदगी वाली जगह पर लंबे समय तक न रखें।
- Do not press sheets in humid or wet environments. गीले या नम स्थान पर शीट्स को दबाएं नहीं।
- Do not delay in removing the protective film. प्रोटेक्टिव फिल्म को देर तक न रखें।
- Do not install on uneven, chemically treated, or dipped plywood without sanding. उबड़-खाबड़ या डिप्ड प्लाई पर बिना सैंडिंग के इंस्टॉल न करें।
- Do not place sheets on damaged or rough surfaces during packing or transport. ट्रांसपोर्ट या पैकिंग के दौरान शीट्स को टूटी या खराब सतह पर न रखें।
- Rang does not recommend any specific glue. Users must test for suitability before application. रंग किसी विशेष गोंद की सिफारिश नहीं करता। उपयोग से पहले उपयुक्तता की जांच करें।
