Installation & Technical Guidelines:

DO'S

- Before installation, ensure the surface is prepared using plywood or MDF. Remove any existing wallpaper or film. Ensure dipped plywood/lipping patti meets interior quality standards. If defects like uneven coating or discoloration are found, sand the affected area to remove the faulty layer.
- Apply a high-quality adhesive to the back of the louvers. For strong bonding, a small amount of hot glue is recommended.
- Louvers can be installed horizontally or vertically. For extra stability, secure them by hammering nails into interlocking edges or grooves.
- Louvers are designed strictly for indoor use.
- Use a circular saw to cut the louvers to the desired size. Ensure the blade is sharp, undamaged, and free of cracks, bends, or missing teeth.
- Clean only with a soft cloth.

DON'TS

- Avoid the use of any chemicals or cleaning detergents.
- Louvers are waterproof, but prolonged exposure to moisture can damage the product.
- Do not install them in areas exposed to direct sunlight or near heat sources such as stoves or hobs.

Note:

- Rang ensures all its products are free from manufacturing defects and are suitable for use in standard indoor environments. In case of a manufacturing defect, Rang is liable only for the product cost.
- Beware of counterfeit products. To ensure authenticity, look for the official Rang sticker or Rang-branded box before purchase.
- Product dimensions may vary by up to $\pm 5\%$. Please note that slight color differences may exist between the actual product and the images shown in the brochure/e-catalogue.

Warranty Exclusions:

Rang will not be held liable for complaints arising from:

- Color variations due to batch differences
- Damage during handling or transit
- Incorrect installation procedures
- Outdoor usage
- Direct sunlight exposure
